

INTRODUCING THE MAZDA2 HYBRID

The newest member of the Mazda family, is also the first Mazda with a hybrid electric powertrain. Delivering excellent fuel efficiency and low emissions, the Mazda2 Hybrid utilises electric power to help you go further on a litre of petrol.

Designed with stylish looks and maximum driving fun at its core, this compact city car has been created for those that want to utilise the electric lifestyle without having to charge a battery or change the way you drive.

EXPRESSIVELY DYNAMIC

With its expressive lines and wide muscular stance, Mazda2 Hybrid's small footprint and edgy design make it as equally at home on the open road as it is on the city streets. All complimented by the large front grille, sweeping lights and aerodynamically sculpted front bumper which make a powerful first impression.

SLEEKLY SPACIOUS

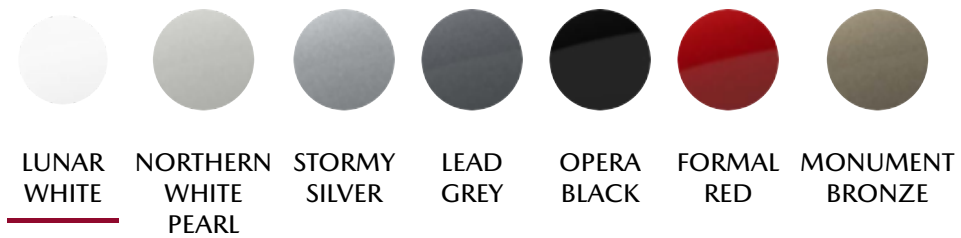

Wide open and unexpectedly spacious for a car this compact, the Mazda2 Hybrid offers a comfortable and roomy atmosphere for up to four adults, as well as 286 litres of cargo space. With a focus on high visual and tactile quality, the driver-focused cabin design puts everything you need, right where you need it – including a dashboard mounted touch-screen centre display for all of your infotainment options.

COLOURS

A stylish selection of colours are available for the Mazda2 Hybrid. Whether it be Lead Grey, or our exclusive Northern White Pearl, all colours provide a highly intense colour that best compliments the lines of the car.

With seven colours to choose from, which colour do you prefer for your Mazda2 Hybrid?

ELECTRIFYING EFFICIENCY

Taking fuel efficiency to the next level, the Mazda2 Hybrid is powered by a petrol engine and a battery-powered electric motor that work together as a full hybrid drive system. When the battery is sufficiently charged, EV mode offers smooth, ultra-quiet pure electric driving in urban environments – with zero tailpipe emissions! The Mazda2 Hybrid's lithium-ion battery gives you the flexibility to minimise use of the engine when driving around town or in the city. And the best part is: regenerative braking uses the electric motor to charge the battery, so no plug's are required.

CLASS-LEADING SAFETY

Enjoy peace of mind with class-leading active safety performance. The Mazda2 Hybrid is available with a range of advanced safety features which are underpinned by an ultra-rigid bodyshell, providing an incredibly strong and lightweight protective safety cell around the driver and passengers. It is also one of the first cars in the segment to feature SRS centre airbags, which help prevent the driver and front passenger from colliding with each other in an impact.

Mazda2 Hybrid boasts a comprehensive list of standard equipment like Lane Tracing Assist (LTA) which features lane centring, Lane Departure Alert (LDA), steering assist and Vehicle sway warning. There is also a Pre-Crash Safety system (PCS), which, when a possibility of a frontal collision is determined, the brakes are automatically applied to help avoid or help reduce the impact of the collision. As a result, the Mazda2 Hybrid has earned the maximum five-star Euro-NCAP crashworthiness rating.

AGILE PERFORMER

Compact and agile, the Mazda2 Hybrid has been designed to be sure-footed and responsive on the road. Its low centre of gravity, weight distribution and body rigidity translates to more enjoyment behind the wheel – reducing body roll and stopping distances as well as improving cornering performance.

The suspension combines excellent ride comfort with enhanced agility, balancing driving dynamics with a relaxing ride. The Mazda2 Hybrid features low noise and vibration levels for a quiet, refined driving experience.

PURE

AGILE

SELECT

PURE

- 15" Steel wheels with wheel covers
- Black fabric seat trim
